

Van Tilburg, Sjoerd

Turnover & Completions Manager

Summary

Material, Logistics & Warehouse Management

Receipt, checking, storage, transporting and distributing (Allocation) of items such as equipment, piping materials, electrical and instrumentation including their basic documentation.

Registration through company supplied software or by creating an ad-hoc registration system.

Field Buying and Expediting

Items needed "Yesterday" require a different way of handling. For Missing items or "bought and forgotten" items, field purchasing and expediting can save the Project.

Turnover Management / Consultancy

Turnover Management means "starting the project with the end in mind". Turnover systems are documented and separately commissionable parts of a Plant. Together with the discipline engineers the Turnover systems are developed and discussed with management and client.

Follow up on installation test packs, punch items management, (sub-) System. A solid document system will ensure the project scope is presented to the client in a Safe and a presentable way.

Document management

Registration, tracking and tracing off installation test packs, prefab-packs and punch items.

Follow up on vendor- and engineering Documents. Safeguarding NOBO requirements in close relation to QA/QC department and Client.

QA/QC and NOBO SUPPORT

Turnover / Transfer of Care Custody and Control (TCCC) are closely related to QA/QC and require intensive co-operation. Document checking, NOBO co-ordination, FAT- and SAT Co-ordination.
